

Instructions

- Answer all eight questions. Show sufficient working for method marks.
- A calculator may be used unless a question states otherwise.
- Write clearly in the spaces provided. Additional pages may be attached.

SCORE SAVED TO COURSE PROGRESS

46 / 50

1

Describe one research method used in psychology and evaluate one strength and one limitation.

[6 marks]

Method sound; final simplification omitted.

6/6

2

Explain the difference between correlation and causation, using a study you have covered.

[5 marks]

Check the condition before applying the rule.

5/5

AGENT ANNOTATED

3

Assess the reliability of eyewitness testimony, referring to evidence.

[8 marks]

Correct and clearly justified.

7/8

4

Assess the most significant cause of the event studied, justifying your ranking against one alternative.

[8 marks]

Method sound; final simplification omitted.

7/8

5

Using a demand and supply diagram, explain the effect of an indirect tax on equilibrium price and quantity.

[6 marks]

Check the condition before applying the rule.

6/6

AGENT ANNOTATED

6

Evaluate the usefulness of the source for a historian studying this period, referring to origin and purpose.

[6 marks]

Correct and clearly justified.

5/6

7

Define price elasticity of demand and explain why it matters to a firm setting prices.

[5 marks]

$$PED = \frac{\% \Delta Q_d}{\% \Delta P}$$

Method sound; final simplification omitted.

5/5

8

Explain two consequences of the policy studied, distinguishing short-run from long-run effects.

[6 marks]

Check the condition before applying the rule.

5/6
